

## INNOVATIVE BIOLOGICAL SEED INOCULANT

**COVERON** is an innovative biostimulant for seed treatment containing different selected, patented and proprietary beneficial microbials. It is the first commercial formulation combining mycorrhizae (*Glomus intraradices* and *Glomus mosseae*) and *Trichoderma atroviride*.

The combined action of several components present in **COVERON** provides multiple mode of action, bringing different advantages and benefits.

## COMPOSITION

Mycorrhizal fungi ( <i>Glomus</i> spp.)	500 spores/g
<i>Glomus intraradices</i>	300 spores/g
<i>Glomus mosseae</i>	200 spores/g
<i>Trichoderma atroviride</i>	3x10 <sup>8</sup> CFU/g

It does not contain genetically modified organisms or pathogenic organisms.

## ACTIONS AND ADVANTAGES

- Increase of yield and harvest quality.
- Uniform plant growth and root system
- Better effectiveness of fertilization.
- Greater resistance to abiotic stress.
- Improve of soil fertility and vitality.
- Harmless to microflora.

# COVERON

## USE & DOSE

**COVERON** is a seed inoculant for extensive crops in powder form.

CROPS	DOSE	USE
Industrial crops / cereals	100 g/100 kg of seeds	Dilute the product in 700 mL of water, adding 100 mL of Coveron Stim for an optimal action.
Horticultural crops	500 g/100 kg of seeds	Dilute the product in 700 mL of water, adding 100 mL of Coveron Stim for an optimal action.

Some fungicides and phosphate fertilizers may slow down the development of the microbials, for more information please contact the Italtollina technical service.

## PACKAGING

0,5 kg - 4 kg

*Suitable for organic farming  
according to EC REG. 834/2007*
