

ITALPOLLINA
HELLO NATURE!

OASIS

N11-S15

STIMULATION OF THE VEGETATIVE GROWTH

OASIS N11 - S15 contains 3 forms of nitrogen which are mixed in a balanced ratio (organic, urea, ammoniacal) to obtain a very efficient fertilizer for the stimulation of vegetative growth. It also contains organic carbon and vegetal peptides for better plant development and yield increase. The sulphur content improves the quality of the harvest and the presence of both organic and chemical nitrogen reduces the number of applications. This fertilizer guarantees a quick absorption at both the foliar and the root level.

COMPOSITION

Total nitrogen (N)	11 %
> Organic nitrogen (N)	1 %
> Ammoniacal nitrogen (N)	5 %
> Ureic nitrogen (N)	5 %
Water soluble sulphur (SO ₃)	15 %
Organic carbon (C)	4 %
pH (1:5)	4,5
Specific weight	1,21 kg/L

THE ADVANTAGES

- Improvement of plant development
- Better yield and quality of the harvest
- Stimulation of the vegetative growth
- Easy and flexible use and application
- No loss of nitrogen due to leaching

OASI RANGE of products is specifically designed for fertigation or distribution on soil, providing organic compounds, nitrogen, nutrients and organic matter for better quality and yield. Good quality organic compounds and vegetal peptides offer important agronomic advantages, first of all best uptake of nutrients. This range improves the growth of plants and makes them more resistant to adverse climatic conditions.

OASI RANGE is powered by LISIVEG, an exclusive production system designed by the R&D of Italtollina, based on the enzymatic hydrolysis of vegetal proteins. It allows to obtain PEPTIDES that, unlike individual free amino acids, have a more prominent, assured and natural biostimulant effect. LISIVEG® lies its strength in the innovative treatment technology that preserves even the weakest components (as Tryptophan) and maintains its activity unaltered.

USE AND DOSE

OASI RANGE is miscible with the most common phytosanitary products and fertilizers. Before using the product, we recommend testing on small surface for compatibility with other products. Don't mix with copper-based products, mineral oils and alkaline products.

Liquid fertilizer for fertigation or foliar application.

	Dose recommended			
	Dosage per ha	Watering in %	Dosage per ha	Dosage per hL
Fertigation	10 - 20 L	0,5 - 1%		
Foliar application			5 - 10 L	0,5 - 1 L for orchards/ vegetables

OASI

N11-S15

PACKAGING

20 L and 1200 kg IBC
