

ITALPOLLINA
HELLO NATURE!

OASIS

STARTER

LET'S GROW WITH NP 3-7

OASIS NP 3-7 is an innovative **STARTER** fertilizer thanks to the high content of phosphorus, designed to guarantee the best nutrition for a good and balanced root development after seeding, transplanting and in pre-blooming. The presence of both organic and chemical nitrogen reduces the number of applications and the quantity of nitrogen fertilization.

OASIS STARTER also contains organic compounds (to improve soil physical structure, favour seed germination and planting establishment) and vegetal peptides (better plant development).

COMPOSITION

| | |
|---|-----------|
| Total nitrogen (N) | 3% |
| > Organic nitrogen (N) | 1,5% |
| > Ammoniacal nitrogen (N) | 1,5% |
| Total phosphorus pentoxide (P ₂ O ₅) | 7% |
| Organic carbon (C) | 14% |
| pH (1:5) | 5,4 |
| Specific weight | 1,18 kg/L |

THE ADVANTAGES

- Improvement of plant development
- Better yield and fruit quality
- It favours seed germination and plant establishment
- No loss of nitrogen due to leaching
- Improvement of soil physical structure

OASI RANGE of products is specifically designed for fertigation or distribution on soil, providing organic compounds, nitrogen, nutrients and organic matter for better quality and yield. Good quality organic compounds and vegetal peptides offer important agronomic advantages, first of all best uptake of nutrients. This range improves the growth of plants and makes them more resistant to adverse climatic conditions.

OASI RANGE is powered by LISIVEG, an exclusive production system designed by the R&D of Italtollina, based on the enzymatic hydrolysis of vegetal proteins. It allows to obtain PEPTIDES that, unlike individual free amino acids, have a more prominent, assured and natural biostimulant effect. LISIVEG® lies its strength in the innovative treatment technology that preserves even the weakest components (as Tryptophan) and maintains its activity unaltered.

USE AND DOSE

OASI RANGE is miscible with the most common phytosanitary products and fertilizers. Before using the product, we recommend testing on small surface for compatibility with other products. Don't mix with copper-based products, mineral oils and alkaline products.

Liquid fertilizer for fertigation.

| Crops | Dose recommended | | Stage |
|------------------------------------|------------------|---------------|---|
| | Dosage per ha | Watering in % | |
| Vegetables | 10 L | 0,6 % | 3 applications every week from 1 week after plantation or transplantation |
| Orchards, vineyards, bananas, kiwi | 10 L | 0,6 % | 3 applications at plantation or vegetative recover |
| Soft fruits, pineapple | 10 L | 0,6 % | 3 applications every week from 1 week after plantation |
| Nursery | | 0,4 % | After plantation |
| Sugar canes | 10 L | 0,6 % | 3 applications after cane emergence |
| Turf | 10 L | 0,6 % | 2 applications after winter 2 applications after summer |
| Ornamentals | 10 L | 0,6 % | After plantation or transplantation |
