HELLO NATURE!

# OASIS

## LIFE

### ORGANIC FERTIGATION FOR QUALITY YIELD

**OASIS LIFE** is an innovative liquid organic fertilizer with a balanced content of organic nitrogen, potassium (not from KCl) and micronutrients which improves plant development and fruit quality. Vegetal extracts and peptides stimulate the metabolism and help the plant to overcome environmental stresses. Organic matter improves biological and physical soil quality, thus increasing fertility.

### COMPOSITION

Total nitrogen (N)	2 %
Potassium oxyde (K <sub>2</sub> O)	3 %
Organic matter	20 %
pH	4,5
Specific weight	1,17 kg/L

### THE ADVANTAGES

- Improvement of plant development
- Better fruit quality
- Stimulation of plant metabolism
- Antistress action
- Increase of soil biological fertility

**OASI RANGE** of products is specifically designed for fertigation or distribution on soil, providing organic compounds, nitrogen, nutrients and organic matter for better quality and yield. Good quality organic compounds and vegetal peptides offer important agronomic advantages, first of all best uptake of nutrients. This range improves the growth of plants and makes them more resistant to adverse climatic conditions.

*OASI RANGE is powered by LISIVEG, an exclusive production system designed by the R&D of Italtpollina, based on the enzymatic hydrolysis of vegetal proteins. It allows to obtain PEPTIDES that, unlike individual free amino acids, have a more prominent, assured and natural biostimulant effect. LISIVEG® lies its strength in the innovative treatment technology that preserves even the weakest components (as Tryptophan) and maintains its activity unaltered.*

**LISIVEG®**

## USE AND DOSE

OASI RANGE is miscible with the most common phytosanitary products and fertilizers. Before using the product, we recommend testing on small surface for compatibility with other products. Don't mix with copper-based products, mineral oils and alkaline products.

Liquid fertilizer for fertigation.

Crops	Dose recommended		Stage
	Dosage per ha	Watering in %	
Vegetables	10 L	0,5%	Doses depends on crop stage - every week after plantation with watersoluble
Orchards	20 L	1,0%	3 applications from fruit enlargement
Soft fruits	10 L	0,5%	From 1st fruit till end of harvest every week with watersoluble
Vineyards	10 L	0,5%	3 applications from closing cluster
Pineapple, bananas, sugar canes	20 L	1,0%	4-6 applications every week with watersoluble
Kiwi	10 L	0,5%	4-6 applications every week with watersoluble
Turf	10 L	0,5%	Every 15 days with irrigation
Ornamentals		0,5%	Every 15 days with irrigation

Foliar application: 200-250 mL/100 L of water, repeating 2-4 times as needed.
