LIQUID FERTILIZER WITH COPPER 9% AND VEGETAL PEPTIDES

SCUDO is a liquid fertilizer with copper properly designed to prevent and cure the deficiency of copper. The action of SCUDO is fast and effective because copper is bound to vegetal peptides: this particular structure makes it easily assimilable and mobile inside the plant.

SCUDO, thanks to the presence of vegetal peptides and other molecules of high biological value, helps plant to overcome rapidly the stress induced by nutritional imbalances and unfavourable environmental conditions.

SCUDO contains copper and thanks to its innovative formulation, its copper content has a low phytotoxicity.

Copper is a fundamental element for plants: it is necessary for chlorophyll formation and it also has a primary role in carbohydrate and protein metabolism.

COMPOSITION

USE&DOSE

Liquid fertilizer for foliar application.

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop.

We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the plant.

SCUDO can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.
