HELLO NATURE!

# VEGAMIN

## PREMIUM ORGANIC BIOSTIMULANT

**VEGAMIN** is a liquid organic biostimulant 100% of vegetal origin for fertigation, suitable for organic farming.

It is a fusion of organic NPK, organic matter and vegetal extracts that **energizes plant growth** and improves **biological and physical soil quality**, increasing fertility.

Thanks to its slow-release organic NPK from vegetal source it can be applied throughout the growing season without risk of phytotoxicity providing **instant plant energy** and an immediate food source for soil microbes to **improve the rhizosphere**.

## COMPOSITION

Organic Nitrogen (N) water soluble	2 %
Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) water soluble	1 %
Potassium oxide (K <sub>2</sub> O) water soluble	3 %
Organic matter	35 %
pH	4
Specific weight	1,20 kg/L

It does not contain genetically modified organisms or pathogenic organisms.

**VEGAMIN is free of animal by-products and suitable for baby food and fresh-cut food.**

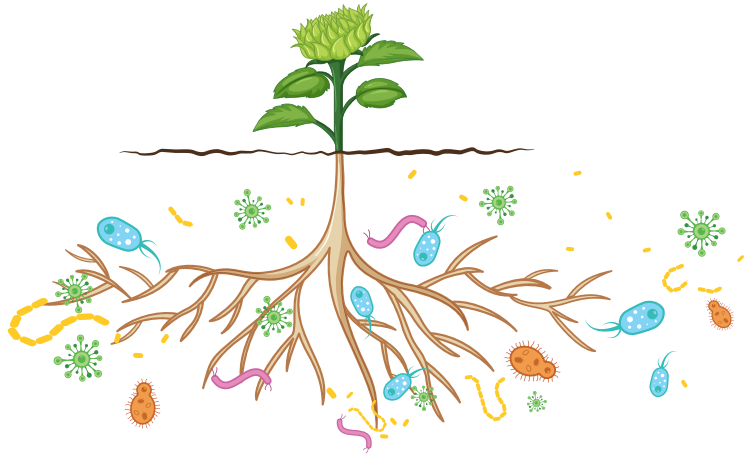

## THE ADVANTAGES

- Biostimulant and antistress action
- Intake of high quantity of organic matter
- Improvement of soil fertility and soil structure
- It helps prevent saline stress
- Instant plant energy from vegetal oligosaccharides (carbohydrates)
- Immediate food source for soil microbes to improve the rhizosphere
- Supply of slow-release organic NPK of vegetal origin
- Reduce soil tiredness and erosion
- Low odor due to 100% vegetal source
- Low conductivity ensures against «burning» injuries to root system

## IMPROVEMENT OF SOIL FERTILITY

**VEGAMIN** promotes the biological activity of the soil by stimulating enzymatic processes and multiplication of useful soil microbials. It improves root development, resulting in greater ability to absorb nutrients.

## USE AND DOSE

**VEGAMIN** is a liquid fertilizer designed for fertigation. Doses and strategy of application vary depending on the crops, the characteristics of the soil and the physiological condition of the plant. In average conditions:

In-furrow as a starter	5 L/ha
Fertigation	5 L/ha. Can be applied every week during growing season.

 **VEGAMIN**

**PACKAGING**  
20 L and 1200 kg IBC

*Suitable for organic farming  
according to EC REG. 834/2007*
