

**ITALPOLLINA**  
HELLO NATURE!

# MYR

## MICRO

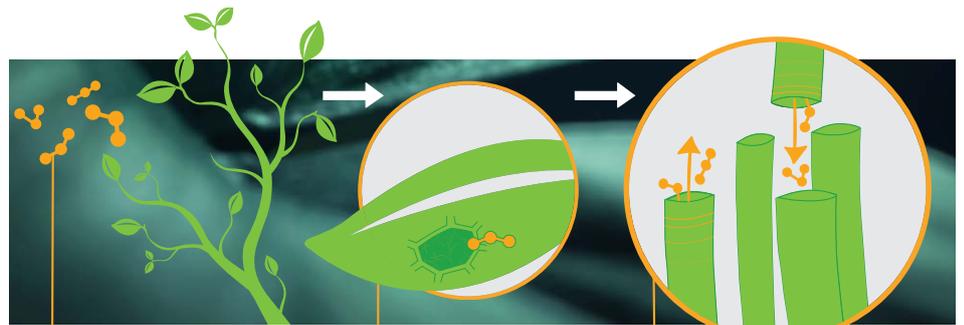

### LEAF LIQUID INTEGRATORS

**MYR RANGE** is based on micronutrients and meso elements complexed with vegetal peptides with the aim of prevent and/or cure nutritional deficiencies and improve yield and fruit quality.

**MYR RANGE** guarantees the highest efficiency and a quick absorption, without losses due to insolubilization. It is the result of a careful research on the mechanisms of vegetal absorption in order to prevent phenomena of phytotoxicity caused by micronutrients.

The peptides of **MYR** are quickly absorbed and then incorporated in the lymph : they can carry out their functions in stressed plants in a few hours, allowing a remarkable saving of energy and permitting the recovery of the optimal conditions for development.

Oligonutritional complexes **MYR** have a stable structure also in alkaline environment, which prevents the formation of salts or insoluble hydroxides.

1) Nutrients arrive on leaves

2) Foliar absorption

3) Translocation of the nutrients inside the plants.

**MYR RANGE** is powered by **LISIVEG**, an exclusive production system designed by the R&D of

**LISIVEG**® *Italpollina*, based on the **enzymatic hydrolysis of vegetal proteins**. It allows to obtain **PEPTIDES** that, unlike individual free amino acids, have a more prominent, assured and **natural biostimulant effect**. **LISIVEG**® lies its strength in the innovative treatment technology that **preserves even the weakest components** (as Tryptophan) and maintains its activity unaltered.

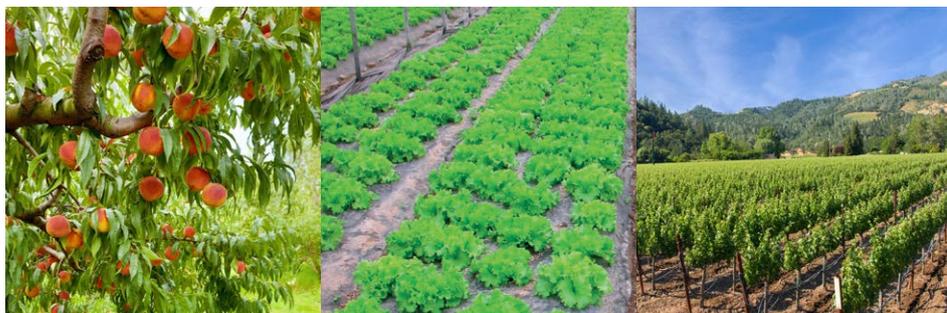

## MYR MICRO

MYR MICRO supplies the most important micronutrients (B, Fe, Mn, Zinc) in a balanced and effective way, in order to help the plant during growth and development, to increase yield and quality of fruits and to improve resistance to climatic stress.

Organic Nitrogen (N)	1%
Boron (B) water soluble	0,6 %
Iron (Fe) water soluble	2,4 %
Manganese (Mn) water soluble	3,2 %
Zinc (Zn) water soluble	2,5 %
Organic carbon (C)	11 %
pH (1:5)	3,5
Specific weight	1,35 kg/L

## THE ADVANTAGES

- Better resistance to cold
- Improve of formation, quality and shelf life of fruits
- Increase the tolerance of plants to environmental stresses
- Chlorosis limitation
- Quick nutritional action

## USE & DOSE

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop.

We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the leaves and the best effectiveness.

MYR range can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.

Liquid fertilizer for foliar application (on leaves).

Crops	Dose recommended		Stage
	Dosage per ha	Dosage per hl	
Vegetables	3 L	300 mL	During vegetative growth before flowering stage 3 applications
Orchards	4-5 L	400 - 500 mL	During vegetative growth before flowering stage - 3 applications + post harvest - 2 applications
Soft fruits, kiwi	4-5 L	400 - 500 mL	During vegetative growth before flowering stage - 3 applications
Vineyards	3 L	300 mL	During vegetative growth before flowering stage - 3 applications + post harvest - 2 applications
Ananas , bananas	5 L	500 mL	During vegetative growth before flowering stage - 3 applications
Nursery		300 mL	Every week
Sugar canes	3 L	300 mL	Every week
Turf, ornamentals	5 L	500 mL	Every 15 days
Rape	5 L	2,5 L*	At flowering stage

\*based on 200 L/ha of spray solution
