

ITALPOLLINA  
HELLO NATURE!

# MYR

## POTASSIUM

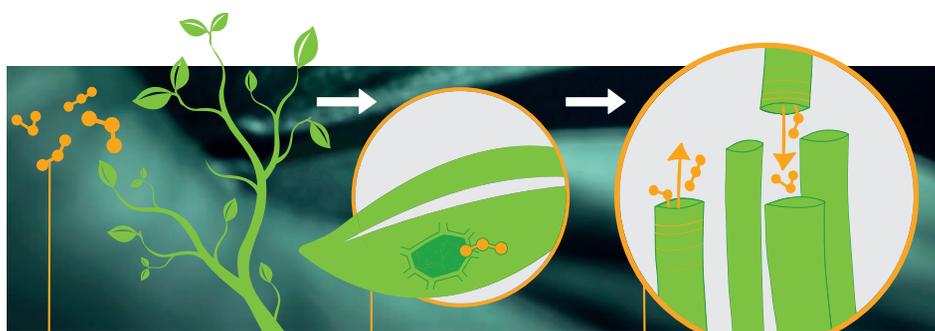

### LEAF LIQUID INTEGRATORS

**MYR RANGE** is based on micronutrients and meso elements complexed with vegetal peptides with the aim of prevent and/or cure nutritional deficiencies and improve yield and fruit quality.

**MYR RANGE** guarantees the highest efficiency and a quick absorption, without losses due to insolubilization. It is the result of a careful research on the mechanisms of vegetal absorption in order to prevent phenomena of phytotoxicity caused by micronutrients.

The peptides of **MYR** are quickly absorbed and then incorporated in the lymph : they can carry out their functions in stressed plants in a few hours, allowing a remarkable saving of energy and permitting the recovery of the optimal conditions for development.

Oligonutritional complexes **MYR** have a stable structure also in alkaline environment, which prevents the formation of salts or insoluble hydroxides.

1) Nutrients arrive on leaves

2) Foliar absorption

3) Translocation of the nutrients inside the plants.

**MYR RANGE** is powered by **LISIVEG**, an exclusive production system designed by the R&D of Italpollina, based on the **enzymatic hydrolysis of vegetal proteins**. It allows to obtain **PEPTIDES** that, unlike individual free amino acids, have a more prominent, assured and **natural biostimulant effect**. **LISIVEG** lies its strength in the innovative treatment technology that **preserves even the weakest components** (as Tryptophan) and maintains its activity unaltered.

## MYR POTASSIUM

MYR POTASSIUM improves color and organoleptic qualities of the fruits, stimulates ripening, promotes the production and accumulation of sugars in the fruits and increases apple red color. It has a nutritional and anti-stress action.

Potassium oxide (K <sub>2</sub> O) water soluble	9 %
pH (1:5)	4.4 - 4.7
Specific weight	1.44 - 1.51

## THE ADVANTAGES

- Promotes the production and accumulation of sugars in fruits
- Improvement of color and organoleptic qualities of fruits
- Nutritional and antistress action
- Prevention and treatment of K deficiency

## USE & DOSE

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop. We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the leaves and the best effectiveness. MYR range can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.

Liquid fertilizer for foliar application (on leaves).

Crops	Dose recommended		Stage
	Dosage per ha	Dosage per hl	
Vegetables	3 L	300 mL	3 applications from fruit enlargement for quality, sugar content and color
Orchards, soft fruits, pineapple, bananas	5 L	500 mL	3 applications from fruit enlargement for quality, sugar content and color
Vineyards	5 L	500 mL	3 applications from closing cluster every 12-15 days
Kiwi	4-5 L	400-500 mL	3 applications from fruit enlargement for quality and sugar content
Sugar canes	5 L	500 mL	2 applications during cane growth
