

NUTRIMYR

CALCIUM-MAGNESIUM

ITALPOLLINA
HELLO NATURE!

NUTRITIONAL BALANCE FOR QUALITY HARVESTS

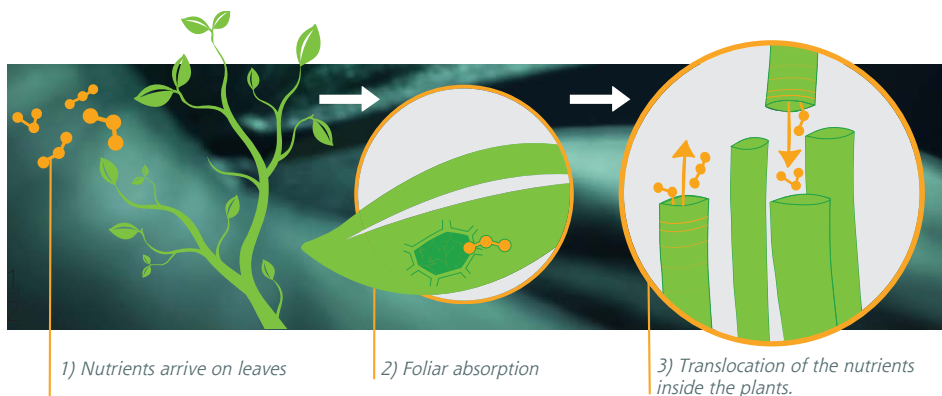

NUTRIMYR CALCIUM-MAGNESIUM is fast acting and effective thanks to:

CALCIUM: prevents deficiencies (eg. Bitter pit of the apple, blossom-end rot of tomatoes, desiccation of the spine in grapevine, tip burn of lettuce etc...). It also improves quality, consistency and shelf life of fruits.

MAGNESIUM: stimulates the formation of chlorophyll and improves the photosynthetic activity. It increases yield and the quality of the harvest.

NITROGEN: enhances the development of the plant and has a synergistic action in the absorption of calcium.

ENHANCED FOLIARS FOR A COMPLETE AND BALANCED NUTRITION

COMPOSITION

Total nitrogen (N)	8 %
Organic nitrogen (N)	0,5 %
Nitric nitrogen (N)	7,5 %
Calcium oxide (CaO) water soluble	8 %
Magnesium oxide (MgO) water soluble	4 %
Organic carbon (C)	3 %
pH (1:5)	3,3
Specific weight	1,37 kg/L

THE ADVANTAGES

- Improve of quality, consistency and shelf life of fruits
- Increase of yield and quality of the harvest
- Stimulation of the formation of chlorophyll
- Improvement of the photosynthetic activity
- Antistress action

NUTRIMYR RANGE is powered by **LISIVEG®**, an exclusive production system designed by the R&D of Italtollina, based on the enzymatic hydrolysis of vegetal proteins. It allows to obtain **PEPTIDES** that, unlike individual free amino acids, have a more prominent, assured and natural biostimulant effect. **LISIVEG®** lies its strength in the innovative treatment technology that preserves even the weakest components (as Tryptophan) and maintains its activity unaltered.

USE AND DOSE

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop.

We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the leaves and the best effectiveness.

NUTRIMYR range can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.

Liquid fertilizer for foliar application (on leaves).

Crops	Dose recommended Dosage per ha	Stage
Tomato	2-3 L	Starting from fruit set - 2-4 applications. Repeat every 10-12 days
Vineyards	2-3 L	Starting from grapes enlargement -3-5 applications. Repeat every 10-12 days
Apple	1-3 L	Starting from petals fall -3-5 applications. Repeat every 8-12 days
Lettuce and radish	1,5-3 L	1-3 applications. Repeat every 12-15 days
Kiwi, cherry	1,5-2,5 L	Starting from fruit set - 3-5 applications. Repeat every 8-12 days
Melon and watermelon	2-3 L	Starting from fruit enlargement -3-4 applications. Repeat every 10-12 days
